

#BECYBERSMART

OWN IT.

Regularly check your social media privacy settings. **Only share information with people and businesses you trust.**

2/3 OF U.S. ADULTS

WITH SOCIAL MEDIA HAVE BEEN HACKED AT LEAST ONCE*

HACKERS ATTACK EVERY

39 SECONDS**

SECURE IT.

Select strong, unique passwords for your accounts and change them often. **If your current password is PASSWORD, QWERTY, ABC123, or any other commonly used phrase CHANGE IT NOW.**

PROTECT IT.

Secure passwords are only part of the total security equation. Take additional steps to **protect your data vault from threats.**

WIFI

Restrict who is allowed on your wireless networks.

BACKUPS

Ensure you have a system in place that has several backups of your data.

FIREWALL

Keep your users protected from intrusion by hackers.

CURRENT TECH

Keep your tech current. Outdated tech is a prime target for cyber attacks.
